Key Findings and Business Recommendations

● KEY FINDING 1

Sales Performance

Sales are distributed across multiple product categories and regions, with some areas contributing more strongly than others.

● KEY FINDING 2

Profitability

Strong sales do not automatically guarantee strong profit, making profitability analysis important alongside sales analysis.

● KEY FINDING 3

Product Performance

Sub-category analysis helps identify products that contribute positively as well as areas requiring closer review.

● RECOMMENDATIONS

1. Review low-profit products

Identify consistently low-profit or loss-making sub-categories and review their pricing and costs.

2. Monitor discounts

Evaluate whether high discounts are reducing profitability and establish appropriate discount controls.

3. Focus on profitable areas

Prioritize categories and regions that demonstrate sustainable profit performance.

4. Track performance regularly

Monitor sales and profit trends over time to identify changes early and support better business decisions.
